Welcome TO THE 2026 CUDLOBE BULL SALE

As ranchers, we are unaccustomed to being positively acknowledged in the public sphere but this year the United Nations declared 2026 as the International Year of Rangelands and Pastoralists. According to the Food and Agriculture Organization of the UN, rangelands make up half the world's land and are home to unique biodiversity and pastoral communities whose livelihoods depend on them (that's us!). *"Pastoralists raise animals, contribute to food security, and hold diverse cultural heritage, local knowledge and preserve ecosystems across the world"*. I don't know that cowboys and ranchers have ever had a more positive international review!

Zooming in, it's an exciting time to be involved in the Canadian Beef Industry as we ascertain our new limits with continued high calf prices and demand for beef holding steady at store counters. Many people have lived their whole lives to see these calf prices and it's reassuring to see them hold on for more than one year. It has been exciting to visit with bull customers over the summer and fall to see their success in the form of new projects, heifer retention, and expansion plans. It's reassuring to see cow calf producers hold steady through this volatile market and political wrangling. Mother nature made us hold our breath for a few moments this year with a dry start, then rain with the usual hail thrown in for some added stress. But the feed yards are full, and most were blessed with extra feed in the end.

This year's sale features new, exciting sire groups with many heifer bull prospects in the offering. We are very proud of this set of bulls and have bred and developed them for longevity and functionality. Please drop in to see the bulls at both yards anytime - we are committed to helping you find the bulls that will match your program's goals. We appreciate your interest and look forward to sharing prime rib with you after the sale to celebrate another successful year!

Sincerely,
The families of Cudlobe

EPD PERCENTILES FOR 2026 CUDLOBE SALE BULLS AVERAGE

50th Percentile is the Averages for all 2025 Black Born Calves

Each Individual Bull that Cudlobe Angus is selling today has its own graph. Go to www.cdnangus.ca and you can take a look at each of them.

ANOTHER REASON WHY *CUDLOBE BULLS* ARE *LEADING* THE WAY IN THE ANGUS INDUSTRY

HOW TO READ THE SALE LOT INFORMATION

EPD DESCRIPTIONS FROM THE CANADIAN ANGUS ASSOCIATION

Calving Ease Direct (CE): describes the percentage of expected unassisted births when a bull is exposed to first-time heifers. The higher the number, the higher the probability that first-time heifers bred to the bull in question will calve with no assistance. The EPD predicts the average difference in ease with which a sire's calves will be born when he is bred to firstcalf heifers.

Birth Weight (BW): describes in pounds the difference in expected progeny weight, on average. A bull with a BW EPD of +4 will, on average, sire calves that are 2 pounds heavier than a bull with a BW EPD of +2 (given equal management).

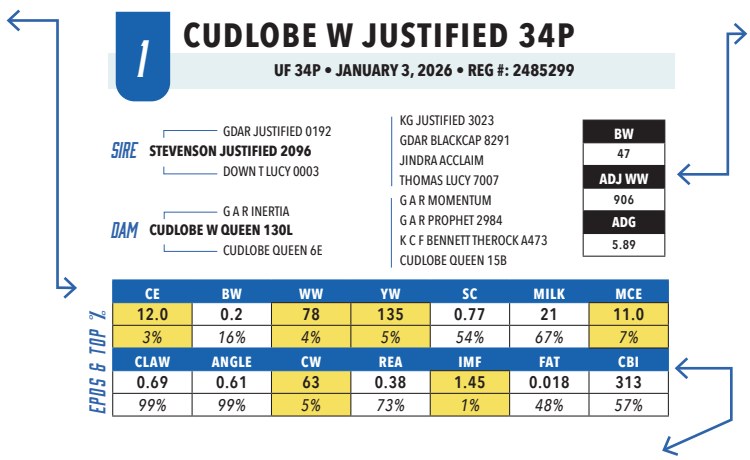

Weaning Weight (WW): describes in pounds the difference in expected weaning weight in progeny, on average. WW EPD is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. A bull with a WW EPD of +50 will sire calves that are, on average, 20 pounds heavier at weaning than a sire with a WW EPD of +30 (given equal management).

Yearling Weight (YW): describes in pounds the difference in expected yearling weight in progeny, on average. YW EPD is a predictor of a sire's ability to transmit post weaning growth to his progeny compared to that of other sires. A bull with a YW EPD of +100 will sire calves that are, on average, 30 pounds heavier at weaning than a sire with a YW EPD of +70 (given equal management).

Scrotal Circumference (SC): Expressed in centimetres, predicts differences in sons' scrotal size. Higher SC is linked to earlier puberty and improved fertility in progeny.

Milk: Indicates the pounds of calf weaning weight due to a daughter's milk and mothering ability. Moderate levels are ideal based on herd environment and management.

Calving Ease Maternal (MCE): describes the probability of not requiring assistance when a bull's daughters calve for the first time. The higher the EPD, the higher the probability that a bull's daughters will not require assistance at calving time.

Raw BW: The calf's actual weight at birth.

Adj 205 WW: Weaning weight adjusted to 205 days for age and dam effects.

Raw Oct 21 Wt -or- Recent ADG: Actual mid-October weight or average daily gain from birth to mid-October, showing real growth performance.

Claw Set (Claw): is expressed in units of claw-set score, with a lower EPD being more favourable indicating a sire will produce progeny with more functional claw set. Ideally, toes are symmetrical, even and appropriately spaced.

Foot Angle (Angle): is expressed in units of foot-angle score, with a lower EPD being more favourable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45- degree angle at the pastern joint with appropriate toe length and heel depth.

Carcass Weight (CW): is expressed in pounds and is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires. A bull with a CW EPD of +30 will sire calves that, on average, will result in 10 pounds more hot carcass weight than the progeny of a bull with CW EPD of +20.

Marbling (IMF): describes the marbling potential of calves from one bull compared to the calves from another bull, given the same management. This EPD is expressed as the difference in grade score. Given the same management, the calves from a bull with a Marb EPD of 0.6 will marble ½ a grade score better than the calves from a bull with a Marb EPD of 0.1.

Ribeye Area (REA): describes in square inches the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat): expressed in inches, describes the differences in back fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

The Canadian Balanced Index (CBI) combines multiple EPDs into a single dollar-value figure reflecting a sire's expected impact on profitability. It balances growth, maternal, and carcass traits to help producers select bulls that maximize overall economic return.

Top %: Shows how an animal ranks within the breed for a specific trait – a lower percentage means higher genetic merit (e.g., Top 1% is elite).

It takes a good one to start the sale and here is the one. Lot 1 is a big long bodied Justified son that checks all your boxes. Low birth weight with big performance makes this guy an easy quick pick bull that will work anywhere. This guy has a unique pedigree in our herd with his Mom being the only GAR Inertia daughter in the cowherd. This guy has carcass maker written all over him. Heifers or cows this guy will do the trick.

Square Deal is a complete genetic outcross bull we were excited to use for his impressive length of body and correct structure, paired with a balanced EPD profile. He has become a high-accuracy performance sire backed with impressive disposition, heifer pregnancy, PAP, foot scores, $M and functional longevity.

These Square Deals are good looking bulls and Lot 12 is no exception. This guy was 82 lbs at birth and still had a weaning weight index of 113. He's going to give ya them nice sized calves that hit the ground and grow. His 38 Special mom is a deep bodied moderate framed cow with a perfect set of feet under her.

Here is a calf that looks just as good on paper as he does in real life. This calf is a looker and he knows it. His Upgrade mother is flush sister to the mother of lot 2 and never has a bad day. They say you always give your kids the good heifers and this cow has done nothing but good things for Merrit's growing cowherd. Lot 13 is a calf to watch and one we will be using ourselves going ahead.

CUDLOBE ANGUS - BREEDING SOUNDNESS EVALUATIONS

LARRIKIN VETERINARY SERVICES LTD.
Mailing Address: c/o 284 Cambridge Cres Strathmore, AB T1P 1S1
t. (403) 983-0771
email: vets@larrikinvets.ca website: www.larrikinvets.ca

Larrikin Veterinary Services is responsible for providing breeding soundness evaluations (BSE) on Cudlobe Angus sale bulls and helps oversee the herd health program. The herd health program is focused on preventative medicine (vaccinations, nutrition, husbandry) which ensures the animals reach top production levels with optimal health and comfort.

Bulls receive multiple vaccines post weaning to help ensure optimal health and reproductive soundness. A modified live vaccine (Express® FP5-VL5 – Boehringer Ingelheim) which provides protection against Infectious Bovine Rhinotracheitis (IBR), Bovine Viral Diarrhea Virus (BVDV), Bovine Respiratory Syncytial Virus (BRSV), Parainfluenza 3 Virus (PI-3), Campylobacter fetus (Vibriosis) and Leptospirosis (Leptospira canicola, L. grippotyphosa, L. hardjo, L. icterohaemorrhagiae, and L. Pomona) is given to the bulls in the spring at the time of the BSE. They also receive a bacterin-toxoid vaccine booster (Ultrachoice® 8 - Zoetis) which provides protection against eight clostridial bacterial strains. To help prevent and reduce severity of foot rot, bulls receive an initial and booster bacterin vaccine (FusogardTM – Elanco) providing protection against Fusobacterium necrophorum in the fall and an additional booster in the spring at the time of the BSE.

A full BSE is done on each bull prior to them leaving the farm. The BSE is an in-depth exam that evaluates overall physical soundness, assesses testicle size and health and ensures normal reproductive anatomy with rectal palpation. A semen sample is collected and evaluated chute side to ensure adequate density, motility and morphologically normal sperm. It is a busy few days but this 'whole picture real time assessment' of each bull ensures that only those meeting all the necessary requirements are lucky enough to meet the ladies!

Be ahead of the rest with this being the first and one of the only chances to get in on the Bedrock herdsire this year. BEDROCK represents a rare combination of elite EPDs, phenotypic excellence, docility and structural soundness, backed by an outcross pedigree that offers mating flexibility. His first calf crop has established him as a curve-bender sire! With over 1,000 calves reported to AHIR, his progeny have a 100 BW ratio, 102 WW ratio and 103 YW ratio. His dam is a beautiful young cow with a gorgeous udder. He excels for many important maternal qualities ranking in the top 15% of the breed for Claw, Angle, HP and $M.

- Big bodied, tidy uddered powerhouse
- Top 20% residual average daily gain, and docility GEPDs, and just take another look at those foot percentiles.
- #2 Foot Angle EPD

CUDLOBE ANGUS - HERD HEALTH

As the herd health veterinarians for Cudlobe Angus, we have worked closely with the operation to design and implement a comprehensive herd health program. Health problems are minimized with a good vaccination program and excellent management.

The bulls are vaccinated at 2 months of age and again at weaning with One Shot BVD (Mannhemia and BVD), Inforce (IBR, BRSV, and PI3) and Ultrabac 7/Somnus (Clostridial and Histophilus Somnus). In the fall after weaning they are given an initial dose and a booster dose of the footrot vaccine, Fusogard. Before delivery in the spring the bulls are given another Fusogard booster as well as the Bovishield FP5 (IBR, BVD, BRSV, and PI3) vaccine. The bulls receive an Ivermectin Pour-On and Boss Pour-On as part of their parasite control program.

We are proud to be associated with the Bolduc's and their cattle operation!

Claresholm Veterinary Services Ltd.

First Blue Collar calf to ever sell here and boy is he a stud. This guy is off a very moderate first calf Enhance 22H daughter that is from Karis's cowherd and boy did she work hard on him. He started at 78 lbs BW actual and weaned off at 816lbs to index at 116. This guy is a meat wagon full of carcass and growth.

CUDLOBE INFLUENCE FEEDER SALE 2026

2026 marked 13 years of marketing Cudlobe Influence Feeder Cattle Sale. This is the longest running genetically influenced calf sale in North America!

The sale took place on Monday October 5 at our market Foothills Auctioneers in Stavely.

It was another very successful sale with approximately 1700 calves sold with consignments from Shepard Creek Ranch, Cudlobe West - Mat & Addy Bolduc, Niznik Ranches, Roy & Karen Hall, Torkelson Farms, Harb"N" Sons Ranch, Prairie Skies Alfalfa LTD. Giles Ranch as well as a new consignment from 1X Ranch in Maple Creek.

Over the last few years there has been a huge demand for these genetically influenced Cudlobe calves. The buyers love the performance these calves bring to their programs. This is evident in the repeat clients competing for the high performing healthy calves in this sale. The calves are being sold into southern Alberta feedlots and also many calves make the journey to southern Ontario .

The commitment of these ranches to participate in this sale has been amazing. The product they deliver is second to none, giving them the reputation that this sale is one you don't want to miss. The consistency, quality, genetic performance and health of the calves continue to top the market.

They have brought a premium price for several years. It is an honour and a privilege to work with Cudlobe Angus, Cudlobe West and the ranchers that believe in and support this sale.

Cudlobe Angus and Cudlobe West are true leaders in the industry establishing generational programmes producing high performance bulls that provide some of the highest carcass data in Canada and cattle that are being sought after by clients from across the country. Their commitment to this genetically influenced calf sale is second to none, with the continued success of their Bull sale clients on the top of their priority list!

We have a tremendous amount of gratitude to be part of this sale and look forward to much more continued success in the years to come!

Rob Bergevin

One of the most sought-after sires in 2023, he is the elite maternal package as he ranks near the top of the breed for $M, $W, HS and HP offering exceptional growth. Rise Above's presence, calm demeanor, tremendous foot quality, depth, width, and Angus character make him one of the most sought after bulls this year.

This is a calf we have liked since he was born. He checks all the boxes for low Birth weight, Growth, and Foot structure. His Mom is an excellent Legendary daughter that has that true angus cow look. We plan to use lot 32 in our AI program next spring and expect big things from this calf going ahead.

Lot 33 is a true heifer bull that has done nothing but grow after weaning. He is currently averaging 5.3 lbs ADG since Weaning and was doing 2.81 lbs ADG on his mother prior to that. His mom is a very moderate Fireball daughter that is very structurally correct.

CUDLOBE WEST - HERD HEALTH

Cow/Calf Health and Management Solutions (CCHMS) collaborate with Cudlobe Angus West to manage their entire purebred and commercial herds through an integrated and comprehensive health, and production management program. Detailed data is collected on each individual at key health and production points and kept in a secure web-enabled database (Telus Animal Record Management (Formerly called Herdtrax®). Together, we continually monitor and audit this data to improve the health, welfare, and efficiency of the entire operation. Data is shared with multiple agencies to build on industry initiatives. Cudlobe Angus West and the Bolduc family continually strive to improve the herd by linking the chute-side and field data through genomic parentage testing, the relentless pursuit of pre-harvest ultrasound carcass data, and targeted breeding strategies. The proof is in the lot close-outs and functional longevity of adult cattle. All of these things culminate to improve the likelihood of success as local genetics move to new challenging environments.

Disease Prevention

Cudlobe Angus West follows a detailed vaccination program:

Calves are vaccinated within the first 10 days of life:
- IBR/PI3/BRSV (MLV) – Inforce 3® (intranasal)

Calves are vaccinated in the spring prior to pasture turnout with the following:
- IBR/PI3/BRSV (MLV) – Inforce 3® (intranasal)
- BVD (MLV) and Mannheimia hemolytica – One Shot® BVD
- 7 way Clostridial and Histophilus somni – Ultrabac® 7/Somnubac®

Calves are vaccinated at weaning with the following:
- IBR/PI3/BRSV/BVD (MLV) and Mannheimia – Bovi-Shield® GOLD One Shot®
- 7 way Clostridial and Histophilus somni – Ultrabac® 7/Somnubac®
- Parasite Control – Ivermectin.

Replacement heifers are vaccinated pre-breeding:
- IBR/PI3/BRSV/BVD (MLV) – Bovi-Shield® GOLD FP®5 (Fetal Protection)

Cows, bred heifers, bulls are annually vaccinated post-breeding:
- IBR/PI3/BRSV/BVD (Killed) – CattleMaster® GOLD FP®5 (Fetal Protection)

Bulls prior to delivery have been vaccinated and treated with the following:
- Fusobacterium Necrophorum – Fusogard™ (footrot and liver abscess vaccine)
- Two doses given twice 60 days apart
- Lice Control – Permethrin

Bulls prior to the delivery will be boostered, and ready for turnout:
- IBR/PI3/BRSV/BVD – Bovi-Shield® GOLD FP®5

Breeding Soundness Examination

Each bull has passed an extensive Bull Soundness Examination which includes soundness of structure, palpation of testis and internal sex glands, scrotal circumference, examination of the penis as well as verifying sufficient sperm motility and morphology. Bulls that are considered to be Satisfactory if they have passed the above criteria at some point in time. [However, traditional measures to assess semen quality often provide inconsistent results in individuals due to a variety of environmental factors and may not always correlate to service capacity. Re-evaluating these bulls closer to breeding season or using genomic parentage to calculate service capacity is a more reliable way to identify bulls sufficient for breeding].

CCHMS is proud to work with Cudlobe Angus West and if there are any questions please contact me and I can always find the time to talk about cows, bulls and the ever-evolving cattle industry.

Congrats on another successful year!

CHMS Cow/Calf Health and Management Solut

Here is a sweet set of 6 flush brothers from the always popular 7J Enchantress cow. She is an excellent moderate framed cow that has all the great sires in her pedigree Growth Fund, Rock, Payweight and Weigh Up. From flushing and her natural calves, she has over 20 calves registered to her with 6 daughters milking in our herd and every bull she has had either sold for breeding or is being used on our own cows. Her lifetime BW average is 73lbs and these 6 Square Deals averaged 76 lbs. If you're looking for a set of good footed heifer bulls these 6 full siblings are what you need to look at.

One of the most useful sires in the A.I. industry for consistently siring high-quality cattle. His sons have topped sales across the continent and his daughters are making wonderful brood cows. He is dependable for siring sound cattle with extra muscle and deep rib, with excellent foot and udder quality.

If you're in the market for a moderate birth cow bull here is a good buy. 81 lbs at birth and from a long and wide Three Rivers daughter so you know he's going to put some pounds on. This is a deep and square calf that is growing hard.

9J did a heck of a job raising both these calves on her own this summer. These 2 will make excellent bulls for your 2nd calvers and will add some carcass value to your calves. 9J is herself a very moderate cow that has some big production numbers and hasn't missed an AI date yet.

The Winchester calves topped the sale last year and we think this group is even better. Winchester was the top-selling feature bull from the 2022 Poss sale. He's one of Clarity's highest $C sons and a maternal brother to Poss Rawhide, while adding a productive and proven donor dam to his portfolio. A big footed, bold ribbed, and deep bodied bull with genetic, phenotypic, and maternal merit to be captured in one package. This sire group is the soggiest, deepest sided bulls in the sale. If you are looking to add a little side and performance to your herd make sure to have these boys marked.

This young sire is very unique in the fact that he offers breed leading marbling score genetics, with a pedigree that does not include many of the standard "carcass" sires. This bull is a complete genetic outcross for the Cudlobe herd and was used on powerhouse females to add some carcass quality while not losing that overall phenotypic eye appeal.

First Justification of the sale here and boy is he a winner. We have used this sire a lot on heifers for 3 years now and boy did it work out well. This calf is exceptional and he has the look and numbers backing him up to feel safe breeding all your heifers to him. Good feet and with Objective and Mandate in his mother's pedigree you know his calves will grow.

Guaranteed easy calving bull here from a 9 yr old cow that has lots of production history behind her. She has 4 daughters in the herd, one of which is in the donor pen and 3 granddaughters. This guy will calve easy and make show alley steers for you to sell or the kind of heifers everyone wants to keep.

Now here's a real deal heifer bull with all the carcass and performance thrown in extra. He has got all the real numbers to back him up also 72 lbs actual BW and weaned off his 1st calf heifer mother at 812 lbs. His great grand dam is the mother of lot 60 so you know there is longevity in this bloodline.

The high seller in the 2023 Cudlobe Bull Sale to Nordal Angus. Landmark was the best son of the Mill Brae Benchmark bull, in which very limited semen was available and was a complete outcross to the Cudlobe herd. Landmark is a powerful bull brimming with muscle expression and an exceptional GEPD profile including performance, carcass merit, maternal, and foot.

Equity was the lead off GVC Stockfund son from the 2024 sale. He is a Sleep Easy sire that allowed Kaitlynn to get a little extra sleep in between the morning sickness. From birth, his calves hit the ground running with explosive growth. His outstanding four year old dam is fancy fronted, clean built with great depth of side and foot at the ground. Ranked #1 in his calf crop for WW and ratioing 121. Average BW on 29 calves was 73 lb.

X
CUDLOBE ERICA 14D

Now here is an excellent flush of 7 full brothers from a proven rockstar of a cow Cudlobe Erica 14D. She has produced over 40 registered animals for us in her short time in our donor pen. She is a perfect footed, deep and long bodied cow with a true angus front end. When we first ordered the Blue Collar semen this flush was planned and man did it work well. These bulls are like peas in a pod with big hips and excellent feet and leg structure. They will add lots of bone to go with their performance and carcass.

We don't often purchase walking bulls here in Canada, but when Dyce saw Midas at the Lonestar Angus sale, he was one he couldn't pass up. Big boned, performance driven with the capacity we wanted to keep adding to the herd. He has sired everything we hoped and then some. His sons are flashy, soft sided bulls that are sure to catch your eye in the pen.

The high seller out of the 2022 Stevenson Angus Spring Sale. Icon was purchased due to his complete package. He possesses a tidy build, with a long spine and a correct solid foot at the ground. Furthermore, he is ranked in the top 10% for calving ease and birth weight, feed efficiency, docility, claw, and carcass EPDs. Bulls like this do not come along very often. 169 calves with an average BW of 74 lb. This set of bulls is everything we had hoped for when we purchased him.

Younger heifer bull here out of an absolute rockstar of a cow. 7J is the mother of the Square Deal flush earlier on in the Sale, and this guy is her natural calf she was bred for after flushing those eggs out at the start of April. Fertility and Functionality is something this cow is known for, and this guy should cover all those boxes.

Another great heifer bull option here. This guy is out of one of the few Combustion daughters we have, and boy did she do good on him. For sure heifer bull here with lots of growth and carcass to add to any herd.

An exciting new sire to our lineup, with all of the credentials for excellence. This VERACIOUS son stems from the prolific Lady cow family, known for consistently producing eye-appealing cattle with extra performance and carcass merit. VALIDITY will capture your attention from every angle. He is dense bodied, heavy muscled, sound structured bull with great foot quality. He offers mating flexibility with exceptional phenotype and a stellar genomic profile.

• TOP GUN is a bull we used last year. A bull picked for his great performance, carcass merit and docility profile paired with incredible depth of side and pin width.
• 210G is a current donor dam, having produced an exceptional quantity of eggs between breedings. She's an exceptionally clean built, strong foundational female with explosive shape.

• Lot 148 follows his dam and sire being clean built with an ideal EPD profile
• Genetically enhanced EPDs available sale day.

Comet provides top ranked Calving Ease and performance in an upscale maternal package with elite carcass figures. Added body dimension and length with pleasing conformation. His great uddered dam is a pasture favorite. These three calves may just be the best Comet calves to date and the last opportunities to get in on a great sire group.

This young sire is very unique in the fact that he offers breed leading marbling score genetics, with a pedigree that does not include many of the standard "carcass" sires. This bull is a complete genetic outcross for the Cudlobe herd and was used on powerhouse females to add some carcass quality while not losing that overall phenotypic eye appeal.

Equity was the lead off GVC Stockfund son from the 2024 sale. He is a Sleep Easy sire that allowed Kaitlynn to get a little extra sleep in between the morning sickness. From birth, his calves hit the ground running with explosive growth. His outstanding four year old dam is fancy fronted, clean built with great depth of side and foot at the ground. Ranked #1 in his calf crop for WW and ratioing 121. Average BW on 29 calves was 73 lb.

TERMS AND CONDITIONS

The cattle in this sale sell under the Canadian Angus Association's Breeder's Guarantee Guidelines.

BUYER'S RISK

The risk of loss and injury of each animal passes to the buyer as soon as the bull is sold. Buyers are responsible for obtaining their own insurance should they so desire. The seller is obligated to ensure that sold animals are fed and cared for until delivery.

PAYMENT TERMS

1) Full Payment on Sale Day

-or-

2) Half Payment due on Sale Day, Remainder due upon Delivery

BULL WINTERING AND DELIVERY

- Wintering provided free until spring delivery can be arranged at the seller's convenience.
- Free Delivery to Western Canada (BC, AB & SK) and the Pacific NW States (Oregon, Idaho, Montana, North Dakota)
- We guarantee that each bull will be delivered in satisfactory condition with a satisfactory semen test.

TRANSFERS

- Registration papers will be transferred when final payment has been made.

SEMEN COLLECTION

The seller reserves the right to collect semen from any sale bull for in herd use only prior to delivery. Semen collection for the buyer can also be arranged prior to delivery at the buyer's expense.

BREEDING GUARANTEE

Bulls are guaranteed to be a breeder for 90 days after initial turn out into the buyers' herd, except for:

a) Animals that suffer injury or disease following delivery

b) Animals subjected to gross negligence or willful misconduct on the part of the buyer.

A bull that settles a cow by natural service and has a satisfactory fertility test performed by a mutually agreed upon licensed veterinarian will be considered a breeder.
